Title: BAIT HOLDER FOR A FISHING LURE

AMENDMENT

Seattle, Washington 98101

October 22, 2004

TO THE COMMISSIONER FOR PATENTS:

INTRODUCTORY COMMENTS

This response is filed in answer to the official action of July 22, 2004. In that action, the Examiner noted certain informalities in the Abstract of the Disclosure which applicant has corrected herein. In addition, the Examiner rejected all of Claims 1-13 as originally filed over a variety of references, most of which disclose the mounting of a bait on a conventional hook and leader arrangement rather than relating to the problem of mounting a bait on a lure while the hook hangs free, which problem applicant has solved by providing a tubular surface around which a bait may be wrapped and a metal wire adapted to be wrapped around the bait to hold it in place while fishing. Applicant has amended the Claims to more clearly set forth his invention, and described each of the references relied on by the Examiner to point out why they neither anticipate nor make obvious the Claims.
